What is this product?

Type

A contract for difference ("CFD") is a popular form of derivative trading. The price of the CFD on a Stock is derived from the price of the respective underlying Stock. CFD trading allows a trader to speculate on rising or falling prices in an underlying stock. Even though you will never own the underlying asset, your return or loss depends on movements in the price of the underlying and the size of your position. For any CFD two prices are quoted: (a) the higher price ('Ask'), at which the investor can buy ('go long') and (b) the lower price ('Bid'), at which the investor can sell ('go short'). The difference between the two is the spread. The leverage embedded within CFDs has the potential to magnify your profits or losses. Stratton Markets offers trading opportunities on a wide range of stocks such as Amazon, Facebook and Alibaba.

By Buying or selling the product you are not holding the underlying asset.

CFD transactions with Stratton Markets are not undertaken on a recognized exchange/regulated market, rather they are undertaken over the counter (OTC).

Objectives

The objective of trading a CFD is to allow an investor to gain exposure to the movement in the value of the underlying Stock (whether up or down), without the actual need to buy or sell the respective underlying Stock. One of the key features of trading CFDs is that the exposure is leveraged, since the CFD only requires a small proportion of the notional value of the contract to be put down upfront as initial margin.

If you believe that the value of a Stock is going to increase, you would buy a number of CFDs with the intention to later sell them when they are at a higher value. The difference between the buy price and your sell price, minus any relevant costs (see below for costs), equates to your profit. On the other hand, if you think that the price of a Stock is going to decrease, you would sell a number of CFDs with the intention to later buy it back at a lower value. However, if the Stock moves in the opposite direction and your position is closed, you would owe us the amount of any loss you have incurred (subject to our negative balance protection).

CFDs on Stocks traded with F1Markets Ltd do not have a pre-defined maturity date and are therefore open-ended. There is no recommended holding period and it is up to the discretion of each trader to determine the most appropriate holding period based on their own individual strategy and objectives. Finally, trading on margin can increase any losses or gains you make.

Please note that margin trading requires extra caution, because whilst you can realise large profits, if the price moves in your favour, you risk extensive losses if the price moves against you.

For more information about margin trading, you can refer [here](#).

Intended Retail Investor

Trading CFDs on Stocks is not appropriate for everyone. These products are most commonly intended for traders who have knowledge and/or experience to understand the characteristics of CFDs and risks associated with trading on margin; want to generally gain short term exposures to financial instruments/markets; are trading with money they can afford to lose.

Since this product has a high risk, persons trading this product will have tolerance for high volatility and losses and can understand the impact of and risks associated with the trading.

Term

Key Information Document- CFD on a Stock/Share

CFD Stock positions generally have no fixed or suggested maturity date. It's up to each individual trader to decide the appropriate time to open and close his positions. However, each individual's position will only be kept open to the extent that he/she has available margin. Failure to deposit additional funds in order to meet margin requirement as a result of negative price movement, may result in the CFD position being auto-closed.

What are the risks and what I could get in return?

Risk indicator

There is no recommended or minimum holding period for this product. You must maintain sufficient margin in your account to keep your positions open. Trading on margin means you could quickly lose your trading balance.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. We have classified this product as 7 out of 7, which is the highest risk class. This is because there is a chance that you could lose all of your trading balance.

Trading risks are magnified by leverage. Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and may also adversely affect your position. As a result, Margin calls may be made quickly or frequently, and in the event of default, your positions may be closed out. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.

Be aware of currency risk. You may receive payments in a different currency; therefore the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Market conditions may mean that your CFD trade on a Stock is opened and closed at a less favourable price, which could significantly impact how much you get back. We may close your open CFD contract if you do not maintain the minimum margin that is required, or if you contravene market regulations. For more information on Margin we encourage you to review our Margin Information.

Technical Risks. Since trading of the product depends on technology i.e. PC, mobile phone, internet etc., you are exposed to electronic disruptions, leading to delays in the opening and closing of a transaction, for which F1Markets Limited shall not be held liable.

This product does not include any protection from future market performance so you could lose some or all of your trading balance. For more information on the Risks associated with trading the product, please see our Risk disclosure document.

Performance scenarios

The below scenarios illustrate potential profit and loss under different scenarios. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies. In any case, your profit or loss depends on how the market behaves and how long you hold the CFD. The stress scenario shows what you might get back during extreme market circumstances, when the market is very volatile.

The following assumptions have been used to create the scenarios found in table 1 below:

CFD on a Stock (held intraday)		
Amazon Stock opening price	(P)	\$1,150
Trade size (per CFD):	(TS)	1 LOT (100 Stock of Amazon)
Margin %	(M)	10%
Leverage	(L)	1:10
Margin Requirement (\$):	$MR = P \times TS \times M$	\$11,500
Notional value of the trade (\$):	$TN = MR \times L$	\$115,000

Key Information Document- CFD on a Stock/Share

Table 1:

BUY/LONG Performance Scenario	Closing Price (incl. spread)	Price change	Profit/Loss	SELL/SHORT Performance Scenario	Closing price (inc. spread)	Price change	Profit/Loss
Favourable	\$1,207.50	5%	\$5,750	Favourable	\$1,092.50	-5%	\$5,750
Moderate	\$1,173	2%	\$2,300	Moderate	\$1,127	-2%	\$2,300
Unfavourable	\$1,092.50	-5%	-\$5,750	Unfavourable	\$1,207.50	5%	-\$5,750
Stress	\$1,069.50	-7%	-\$8,050	Stress	\$1,230.50	7%	-\$8,050

The figures shown above indicate intraday trading and thus do not include the cost of positions held open overnight. If you have been sold this product by someone else, or have a third party advising you about this product, these figures do not include any cost that you pay to them. The figures do not take into consideration personal tax situation, which may affect how much you get back.

What happens if F1Markets Ltd is unable to pay out?

If F1Markets Ltd or its liquidity provider is unable to meet its financial obligations to you, this could cause you to lose the value of any position's you have with F1Markets Ltd. However, in such cases, you may be eligible for Compensation under the Investors' Compensation Fund (ICF), which covers eligible investments up to EUR 20,000 per person, per firm. If you wish you may get more information on the ICF click [here](#). F1Markets Ltd segregates your funds from its own money in accordance with the Cyprus CySEC Client Asset rules. The indicator shown above does not consider this protection.

For more information, you can visit the Cyprus Securities and Exchange Commission at: <https://www.cysec.gov.cy/>.

What are the costs for CFDs Stock positions?

Before you begin to trade CFDs on Stocks, you should familiarise yourself with all the below costs for which you will be liable and which are capable of reducing your net profits or increase your losses.

For more information on costs please view our [General Fees Document](#). The below table portrays an illustration of types of costs along with their meaning:

One off costs	Spread	The difference between the buy price and the sell price is called the spread. This cost is realised each time you open and close a trade.
	Currency Conversion	Any cash, realised profit and losses, adjustments, fees and charges that are denominated in a currency other than the base currency of your account, will be converted to the base currency of your account and a currency conversion fee will be charged to your account.
Ongoing costs	Daily holding Cost/Swap/Rollover	A fee is charged to your account for every night that your position is held. This means the longer you hold a position, the more it costs. On Wednesdays, Swap is charged 3 times. Swap can be viewed on the trading platform

How long should I hold it and can I take money out early?

There is no recommended holding period. You can open and close a CFD position on a Stock at any time during market hours.

How can I complain?

The Company has established and maintains a Complaints Handling Procedure which you can find it [here](#). If you wish to submit a complaint you can submit the online form via the following link or send an email to info@strattonmarkets.com.
